Reset
If the LCD display malfunctions, press the RESET key located on the back of the unit to reset the translator.

CAUTION: *Personal set up and all stored phone data will be permanantly erased.*

Earphone Installation (not included)
Plug the earphone into the socket which is located on the left side of the unit. Turn the Volume to LOW to avoid any harm to hearing.

Battery Installation
This translator is operated by two Lithium batteries (#CR2032). Batteries should be replaced when display looks dim or voices become distorted.

To insert or replace the batteries, turn the power off and move the case back battery door lock to OPEN, slide the battery door away, insert two new batteries, making sure that polarity is correct. Put the battery door back on the main unit and shut the battery door lock firmly. To retain phonebook records in the Data File, battery replacement process must be completed within 60 seconds. Alternatively, you can save the data elsewhere at your own choice.

Operating Temperature And Environment
To prevent malfunction, the translator should not be exposed to extreme temperatures such as below −10 ˚F or higher than 40 ˚F. Do not immerse the translator in water.

Warning
In an environment with high electrostatic discharge, the product may not operate normally. It may be necessary to reset the unit.
